

Security Obsession Theory

Written by: Mrs. Dalia Muhammad Hawari

The events of 11 September are the spark which was used by George W. Bush, the Junior in America to ignite the wick of his project of developing and reforming the Middle East by the campaign of the initiative of the New Middle East and applying the "Security Obsession" theory. It is the vision through which the United States will control the world and the sources of petrol in a developed imperialistic way which is encased by seeking security and peace and spreading democracy in the Middle east which was confirmed through the annual development report for the two years 2002, 2003 which talked about backwardness , lack of freedom and corruption.

So the United States adopted the idea of war against terrorism in what is called " terrorism across continents." It sheds the light on the Middle East which came to threaten the security of America under the pretext that it is the womb from which terrorism, crime and illegal immigration are born. So America spread what is called the creative anarchy by creating circumstances for the eruption of violence and war in all the areas so as to give the opportunity for the United States, Israel and Britain to draw the map of the Arab world anew in a way which suits its imperialistic ambitions.

America began with Afghanistan and fighting Usama Bi Laden the strategic enemy which was made by the United States in order to fight terrorism around the world so that it adopts fighting terrorism around the world, occupying Iraq in March 2003 through which it aimed to impose its hegemony on the states of the area, to control the sources of petrol and to get rid of President Saddam Hussein at the hand of the Iraqi opposition. The occupation of Iraq by the United States represents the most dangerous link in the scheme of hegemony over the sources of international energy through influencing the world economy in a way which supports its

existence as a controlling power in the Middle East and as a supporting power for it in protecting the security of Israel in exchange for weakening the power of the Arab states in front of it.

So after the invasion of Iraq by the United States of America and Britain, Iraq has not enjoyed security until our present time, this is besides dividing Iraq into mini states to weaken Iraq (Sunni, Shi'ite and Kurdish) and the Israeli support for the Kurds and imbibing hatred among them and while occupying them in fighting each other, the Americans enjoy the Iraqi petrol. This is in addition to toppling down the Libyan regime, getting rid of President Al-Qadhafi, the war which is going on in Syria which is supposed to fall had it not been the standing of Russia by the side of the Syrian regime, and the war which is going on between the Huthies and the regime of Abdallah Saleh which led to his assassination, and the threat of the Huthies for the Kingdom of Saudi Arabia. As for the area of the Arabia Gulf , its security is tied to the petrol supplies and for firmly controlling the Middle East area and strengthening and supporting the existence of the state of Israel. It is in the interest of the American national security and for the protection of its interests, the states of the Arabian Gulf should be a secure area.

In the Arab republic of Egypt the plan of the United States did not succeed . So the surprise for them was that the army controls the state and there are some terrorist groups which remain in Sinai.

After finishing off with Al-Qa'ida organization as a strategic enemy , and the failure of the United States in convincing the international community with the reasons which led to occupying Iraq, it had to find a new strategic enemy. So The Islamic State Organization, Da'ish (ISIS) appeared in the form of the " Islamized terrorism." It is a Western making to implant the idea of the need for security via the media and transmitting the pictures of slaughtering , violence and methods of torturing people in the Arab areas which were seized by these extremist groups , carrying the picture of the new Islam to the world in the form of the extremist and violent Islam and

spreading hatred of Islam in the worst picture in order to silence the entire world about any American moves which will be directed against the Arab states, and making the security obsession the axis of the world's attention in order to give them the right to fight terrorism.

So the security obsession theory is to make the world need security which will not be available except by means of the United States of America. The one who wants security pays the price for buying it from the United States, let alone the allegiance, obeying and interfering in the internal and external affairs of these countries.

There is a security obsession which is linked with Iran and nuclear arming and its role in supporting the resistance movements in Palestine, Syria and Lebanon. It is a message to America that Iran is a main player in the area. This led to threatening main hinges of the American interests in the Gulf and Israel. This prompted the United States to the road of negotiations with Iran, containing it and cooperating with it in lieu of recognizing it as a great regional power in the area and taking into consideration its interests and its national security.

As for the Palestinian Question and adopting the peace process between the Palestinian and the Israeli which did not prove any success until now, all the mediations and initiatives were not applied on the real ground but they are like gaining the time to build settlements and distracting the Palestinians by internal reforms and supplying them with aids which come through the American Congress and these aids are allocated for fighting violence. The majority of the American Congress members do not have the least idea about Palestinian-Israeli conflict. So no project or agreement will be applied. What the Israelis and the Americans are seeking according to a previously prepared scheme is to cancel the two-state project, declaring Jerusalem as the capital of Israel, annexing the West Bank to the Jordanian Kingdom, transforming the Palestinian security forces into civilian police which follow it, making the Gaza Strip under the rule of the Arab Republic of Egypt and transforming the Palestinian security forces into a civilian police

which follow it. There is another scheme which, if it is implemented, the Palestinian Question will be liquidated for ever and this is annexing the Sinai Peninsula and declaring it as the State of Palestine. Thus the city of Jerusalem gets out of the international equation and the Arab-Israeli conflict.

The area of the Middle East is before a big structural and institutional transformation and a geographical transformation as well. It is imposed on the Middle East by the United States. It is built on the security obsession theory the purport of which is distracting anything from the minds of the countries towards fear and anxiety and insisting on asking for the security needs from the great countries in order to protect their own countries and to protect their ruling regimes, as well as being a convincing reason to interfere in their internal affairs. By this, the United States will have succeeded in occupying the entire Middle East and guaranteed not harming the security of Israel.
